

The Electromagnetic Spectrum

Create a slideshow using Keynote.

Your Keynote should include a Title Slide and an individual slide for each type of light on the Electromagnetic Spectrum. Be sure to include the following information.

You may use the internet, text-book, or our ch. 18 slides to aid in this task.

- The **names** of the types of wave
- The **order** that they're arranged in.
- Approximate **wavelength** and **frequency**
- The **uses** of each type of wave.
- How each type of wave is **made**.
- The **dangers** of each type of wave.
- All electromagnetic waves can cross **a vacuum**.
- Does it get through Earth's atmosphere?
- All electromagnetic waves travel at the **speed of light**.
